Forged Floral Forms

Instructor: Roy Adams

Class Length: 2 days

This class is being lead by Roy Adams of Christ Centered Ironworks and will focus on expressive forging to create floral forms. There is no precise equation to create a perfect forged botanical… that is where experimentation comes in. Roy will share techniques for creating several petal and leaf types as well as texturing techniques. Students will have the opportunity to have guided experimentation as they create floral forms from their own imagination. Some blacksmithing experience preferred, but not necessary.
